

REMARKS

In response to the requirement for an election of species, applicants select "Species B", with traverse.

No justification for the requirement has been advanced and it is therefore impossible to reply to the Examiner's position. Moreover, species "A" and "B" are not mutually exclusive but rather overlap. A device have a bumper on upper and lower members has a bumper on the lower member.

Claims 1-10, 12 and 13 read on the elected species.

An obvious typographical error in claim 13 has been corrected.

The attention of the Examiner is invited to the IDS file August 13, 2004.

Withdrawal of the election requirement and allowance of all claims is respectfully requested.

Dated: April 6, 2005

Respectfully submitted,

By
